

Take a break from creating all of your group's social media content and enjoy allowing this social media graphics package to boost your student ministry's online presence.

You will find enough graphics to post 2-4 times each week, with Instagram *story* and *post* formats available. Listed below are descriptions of each set of graphics included, along with an explanation of how I would use them.

### **Breaks**

Use these graphics to communicate with your group when there are upcoming breaks in your weekly programming (i.e. Fall Break).

### **Encouragement**

These encouragement graphics are meant to boost morale, and can simply be a great touch point with your students at any point during the week.

I use these to start the week, jump into the weekend or for specific reminders for your weekly programming.

### **Questions**

These graphics are just fun! Get to know your students better with these engaging questions!

I would use these to plan an element of programming for an upcoming week around the responses to the questions. You could easily turn these into interactive polls on Instagram *stories*.

### **Scripture**

Continue sharing God's encouraging truth with your students at any point throughout the week.

I like to post a weekly Scripture and devotional thought on our student ministry page.

### **Story Backgrounds**

Download Youth Ministry | Get Social: October Edition | How to Use Guide | Kendall Yeaton

Get creative! Use these background images on your Instagram *stories* to create polls, question boxes, quizzes, countdowns, etc. Have fun with the features Instagram offers.

### **Final Notes**

Have a great time engaging with your students on social media as a continuation of the relational ministry taking place throughout the week!
